

Adjective Connotation (& Word Form)

Part One: Under each word at the top of a column, write synonyms, or words that mean essentially the same thing. You can only put one word on each line, and no word can be repeated. Whatever words you write should be able to complete the sentence: He/She is _____. Finally, rank the synonyms within each column from 1 (least) to 7 (most) in terms of their intensity of that word.

SAD	MAD	GLAD
1. _____	1. _____	1. _____
2. _____	2. _____	2. _____
3. _____	3. _____	3. _____
4. _____	4. _____	4. _____
5. _____	5. _____	5. _____
6. _____	6. _____	6. _____
7. _____	7. _____	7. _____

Part Two: Using the words that you wrote above in each column, turn the adjective form that you used (above) into a noun form below. For example, the adjective “sad” would turn into the noun “sadness.” Be sure that you keep the words in the same order that you had them above, so that number 1 in the SAD column above is still number 1 in the SAD column below, and so on. Whatever words you write should be able to complete the sentence: He/She is full of _____.

SAD	MAD	GLAD
1. _____	1. _____	1. _____
2. _____	2. _____	2. _____
3. _____	3. _____	3. _____
4. _____	4. _____	4. _____
5. _____	5. _____	5. _____
6. _____	6. _____	6. _____
7. _____	7. _____	7. _____
