

Tier 4.0: Pre-Writing Worksheet 2

Student-Created Project

Directions: Based on the approved project, and the official, agreed upon prompt, the student will create (and get approved) a worksheet that labels what evidence needs to be collected from any and all sources, as well as explanations for the evidence. Using subheads, etc., split up the different types of evidence that will need collected by different topics, etc. (based on your outline or sketch), and make sure to have enough room for multiple pieces of evidence and explanations as appropriate. Please see the other tier worksheets for examples as to how you might choose to set it up, specifically 3.0, 2.5, and one of the other three (as they are all very similarly structured).
