

Family Background

Directions: Talk to your parents, aunts, uncles, grandparents, etc., to learn about your family's ethnic/nationality makeup. Below each person, write down what ethnicity/nationality (or nationalities) they were. If you're unable to find out a person's background, write a question mark below that person. If you know which person/people actually immigrated to America, circle that person/those people in addition to writing down where they came from.
