

## Psychology Texts Analysis

Directions: Choose either the first row or the second row of articles in the Psychology, etc. subsection of the Weebly Text page. For each article in that row, answer the following questions, and then determine what similarities the articles have in terms of their ideas (how, though they are about different ideas/theories, do they seem to agree and/or work together?).

### Text 1

Title:

What is the main/central Idea of the article?

List/name key ideas/facts that help support the main/central idea.

What ideas in this article do you agree with **and/or** disagree with? Why?

Name at least one question you have based on this article (what isn't clear or what new questions does it create?).

## Text 2

Title:

What is the main/central Idea of the article?

List/name key ideas/facts that help support the main/central idea.

What ideas in this article do you agree with **and/or** disagree with? Why?

Name at least one question you have based on this article (what isn't clear or what new questions does it create?).

## Comparison

In what ways do the ideas of these two articles seem to tie together/agree? *Be specific*, citing specific ideas from each and explaining what makes them tie together.
